STRENGTHS

- Problem Solving
- Clean Architecture
- REST API Design
- Team Collaboration
- Fast Learner

EDUCATION

Level 5 Software Development

PROFESSIONAL SUMMARY

Passionate System Engineer specializing in C#, ASP.NET Core, Blazor, SQL Server, REST APIs, Dapper, and Entity Framework Core. Experienced in designing scalable web applications, secure APIs, and database-driven enterprise systems, with a strong focus on clean architecture and maintainable code.

PROJECTS

Gallery Project

Built with Blazor, ASP.NET Core Web API, and SQL Server — an image gallery application with upload, categorization, and dynamic browsing through a responsive front end.

Task Management Platform

Full-featured platform with authentication, role-based dashboards, and reporting tools for team productivity tracking.

Inventory Management System

Manages stock, suppliers, and warehouses with real-time reporting and data-driven inventory insights.
